## Mrs. Rayman's 6 th Grade Math Weekly Lesson Plans

## Common Core State Standards

6.RP. 1 Understand the concept of a ratio and use ratio language to describe a ratio relationship between two quantities.
6.RP. 3 Use ratio and rate reasoning to solve real-world and mathematical problems, e.g. by reasoning about tables of equivalent ratios, tape diagrams, double number line diagrams, or equations.
6.RP.3a Make tables of equivalent ratios relating quantities with whole-number measurements, find missing values in the tables, and plot the pairs of values on the coordinate plane. Use tables to compare ratios.

## Essential Question: How do you use ratio concepts and ratio reasoning to solve problems?

## Monday Engage NY Lesson 1-15

Objective: Students associate with each ratio $A: B$ and the ordered pair ( $\mathrm{A}, \mathrm{B}$ ) and plot it in the $\mathrm{x}-\mathrm{y}$ coordinate plane. Given a ratio table, students will plot the ratios in the plane and observe that they lie on the line through the origin and the coordinates in the line satisfy $y=k x$ where k is the value of the associated ratio.

Agenda:

1. Warm up: Ratio of the Day AND "Equivalent Video (a review of equivalent fractions to help relate to finding equivalent ratios and the constant" Video: https://www.youtube.com/watch? $\mathrm{v}=\mathrm{vKXqzpz-G0s}$
2. Classwork: Engage NY Lesson 15 Exercises 1-7
3. Exit Ticket: "Ratio Tables" Exit Slip: Explain the advantages and disadvantages of using each of the representations of equivalent ratios: table, double number line, equations, and graphs.
4. Homework: Engage NY Lesson 15 Problem Set/Homework

## Tuesday Engage NY Lesson 1-17

Objective: Given a rate, students will find ratios associated with the rate, including a ratio where the second term is one and a ratio where both terms are whole numbers. Students recognize that all ratios associated to a given rate are equivalent because they have the same value.
Agenda:

1. Warm up: Ratio of the Day AND "Ratios and Unit Rate" Videos: https://www.youtube.com/watch?v=Dv NVDjG1Rk or https://www.youtube.com/watch?v=RQ2nYUBVvqI (Note- this is a repeat from 2 weeks ago to teach UNIT RATES and Associating rates with ratios... or RAP https://www.youtube.com/watch? $\mathrm{v}=11 \mathrm{JY} 3 \mathrm{p}-1 \mathrm{BIQ}$
2. Classwork: Engage NY Lesson 17 Examples 1-6
3. Exit Ticket: Tiffany is filling her daughter's pool with water from a hose. She can fill the pool at a rate of $1 / 10$ gallons $/$ second. Create at least three equivalent ratios that are associated with the rate. Use a double number line to show your work.
4. Homework: Engage NY Lesson 17 Problem Set/Homework

## Wednesday Engage NY Lesson 1-18

Objective: Students make use of the structure of division and ratios to model as a quantity. Students interpret a rate as a division of two quantities, or better yet, as a fraction which is the first step toward converting measurement units using rates later on.
Agenda:

1. Warm up: Ratio of the Day AND "Engage NY Lesson 18" Videos: https://www.youtube.com/watch?v=bWdg4BSAo-Q
2. Classwork: Engage NY Lesson 18 Exercise 1
3. Exit Ticket: Alexandra drove from Michigan to Colorado to visit her friend. The speed limit on the highway is 70 miles/hour. If Alexandra's combined driving time for the trip was 14 hours, how many miles did Alexandra drive?
4. Homework: Engage NY Lesson 18 Problem Set/Homework

## Thursday Engage NY Lesson 1-19

Objective: Students solve problems by analyzing different unit rates given in tables, equations, and graphs.
Agenda:

1. Warm up: Ratio/Rate of the Day AND "Unit Price Video" https://www.youtube.com/watch?v=aJ3Dr4pmyPw
2. Classwork: Engage NY Lesson 19 Examples 1-3
3. Exit Ticket: Kiara, Giovanni, and Ebony are triplets and always argue over who can answer basic math facts the fastest. After completing a few different math fact activities, Kiara, Giovanni, and Ebony record their data... (problem on students exit slips)
4. Homework: Engage NY Lesson 19 Problem Set/Homework

## Friday Engage NY Lesson 1-20

Objective: Students solve problems by analyzing different rates given in words, tables, equations, and graphs.
Agenda:

1. Warm up: Ratio/Rate of the Day AND Video: https://www.youtube.com/watch?v=InQHvGr9Ybc
2. Classwork: Engage NY Lesson 20 Example 1 and Exploratory Challenge
3. Exit Ticket: Value Grocery Mart and Market City are both having a sale on the same popular crackers. McKayla is trying to determine which sale is the better deal. Using the given table and equation, determine which store has the better deal on crackers? (Equation and Table written on Exit Ticket)
4. Homework: Engage NY Lesson 20 Problem Set/Homework

## Friday Engage NY Lesson 1-21, 1-22, and 1-23

Objective: Students use rates between measurements to convert measurement in one unit to measurement in another unit. They will manipulate and transform units appropriately when multiplying or dividing quantities.
Agenda:

1. Warm up: Ratio/Rate of the Day AND Video: https://www.youtube.com/watch?v=XKCZn5MLKvk and Metric System Rap https://www.youtube.com/watch?v=hY6K5eNkxp8
2. Classwork: Engage NY Lesson 21, 22, and 23 Example 1 and Exercises 1 \& 2
3. Exit Ticket: Jordan and Sophie made 4 gallons of lemonade for their lemonade stand. How many quarts did they make? If they charge $\$ 2.00$ per quart, how much money will they make if they sell it all?
4. Homework: Engage NY Lesson 21, 22, and 23 Problem Set/Homework

6.RP.3a Make tables of equivalent ratios relating quantities with whole-number measurements, find missing values in the tables, and plot the pairs of values on the coordinate plane. Use tables to compare ratios.

Essential Question: How do you use ratio concepts and ratio reasoning to solve problems?

## Monday Engage NY Lesson 1-17

Objective: Given a rate, students will find ratios associated with the rate, including a ratio where the second term is one and a ratio where both terms are whole numbers. Students recognize that all ratios associated to a given rate are equivalent because they have the same value.
Agenda:

1. Warm up: Ratio of the Day AND "Ratios and Unit Rate" Videos: https://www.youtube.com/watch?v=Dv NVDjG1Rk or https://www.youtube.com/watch?v=RQ2nYUBVvqI (Note- this is a repeat from 2 weeks ago to teach UNIT RATES and Associating rates with ratios... or RAP https://www.youtube.com/watch?v=|1JY3p-1BIQ
2. Classwork: Engage NY Lesson 17 Examples 1-6
3. Exit Ticket: Tiffany is filling her daughter's pool with water from a hose. She can fill the pool at a rate of $1 / 10$ gallons $/$ second. Create at least three equivalent ratios that are associated with the rate. Use a double number line to show your work.
4. Homework: Engage NY Lesson 17 Problem Set/Homework

## Monday Engage NY Lesson 1-18

Objective: Students make use of the structure of division and ratios to model as a quantity. Students interpret a rate as a division of two quantities, or better yet, as a fraction which is the first step toward converting measurement units using rates later on.
Agenda:

1. Warm up: Ratio of the Day AND "Engage NY Lesson 18" Videos: https://www.youtube.com/watch? v=bWdg4BSAo-Q
2. Classwork: Engage NY Lesson 18 Exercise 1
3. Exit Ticket: Alexandra drove from Michigan to Colorado to visit her friend. The speed limit on the highway is 70 miles/hour. If Alexandra's combined driving time for the trip was 14 hours, how many miles did Alexandra drive?
4. Homework: Engage NY Lesson 18 Problem Set/Homework

## Tuesday Engage NY Lesson 1-19

Objective: Students solve problems by analyzing different unit rates given in tables, equations, and graphs.
Agenda:

1. Warm up: Ratio/Rate of the Day AND "Unit Price Video" https://www.youtube.com/watch?v=aJ3Dr4pmyPw
2. Classwork: Engage NY Lesson 19 Examples 1-3
3. Exit Ticket: Kiara, Giovanni, and Ebony are triplets and always argue over who can answer basic math facts the fastest. After completing a few different math fact activities, Kiara, Giovanni, and Ebony record their data... (problem on students exit slips)
4. Homework: Engage NY Lesson 19 Problem Set/Homework

## Tuesday Engage NY Lesson 1-20

Objective: Students solve problems by analyzing different rates given in words, tables, equations, and graphs.
Agenda:

1. Warm up: Ratio/Rate of the Day AND Video: https://www.youtube.com/watch?v=InQHvGr9Ybc
2. Classwork: Engage NY Lesson 20 Example 1 and Exploratory Challenge
3. Exit Ticket: Value Grocery Mart and Market City are both having a sale on the same popular crackers. McKayla is trying to determine which sale is the better deal. Using the given table and equation, determine which store has the better deal on crackers? (Equation and Table written on Exit Ticket)
4. Homework: Engage NY Lesson 20 Problem Set/Homework

## Wednesday Engage NY Lesson 1-21, 1-22, and 1-23

Objective: Students use rates between measurements to convert measurement in one unit to measurement in another unit. They will manipulate and transform units appropriately when multiplying or dividing quantities.
Agenda:

1. Warm up: Ratio/Rate of the Day AND Video: https://www.youtube.com/watch?v=XKCZn5MLKvk and Metric System Rap https://www.youtube.com/watch? $\mathrm{v}=\mathrm{hY} 6 \mathrm{~K} 5 \mathrm{eNkxp} 8$
2. Classwork: Engage NY Lesson 21, 22, and 23 Example 1 and Exercises 1 \& 2
3. Exit Ticket: Jordan and Sophie made 4 gallons of lemonade for their lemonade stand. How many quarts did they make? If they charge $\$ 2.00$ per quart, how much money will they make if they sell it all?
4. Homework: Engage NY Lesson 21, 22, and 23 Problem Set/Homework

## Thursday Unit 1 Vocabulary

Objective: Students will review and learn all vocabulary words for Unit 1. They will work with the definitions and provide examples and nonexamples for all words.

Agenda:

1. Warm up: Ratio of the Day AND "Unit Rates" Video: https://www.youtube.com/watch?v=liW ALi4Qj8 OR
https://www.youtube.com/watch?annotation id=2563e028-aff3-4a3f-bd3d-7bf8dcc45840\&feature=cards\&src vid=|BP1TmBXIkY\&v=ZejizwRUqgc
2. Classwork: Vocabulary
3. Homework: Unit 1 Vocabulary and Crossword

## Friday Engage NY Lesson 1-24

***Objective: Students will use ratio reasoning to convert measurement units; manipulate and transform units appropriately when multiplying or dividing quantities
Agenda:
5. Warm up: Ratio/Rate of the Day AND Video:
6. Classwork: Engage NY Lesson 24 Example 1 and Exploratory Challenge
7. ***Exit Ticket: Value Grocery Mart and Market City are both having a sale on the same popular crackers. McKayla is trying to determine which sale is the better deal. Using the given table and equation, determine which store has the better deal on crackers? (Equation and Table written on Exit Ticket)
8. Homework: Engage NY Lesson 24 Problem Set/Homework
