

Unit 5 Common Core State Standards

6.SP.1 Recognize a statistical question as one that anticipates variability in the data related to the question and .accounts for it in the answers	6.SP.2 Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.	6.SP.3 Recognize that a measure of center for numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.	6.SP.4 Display numerical data in plots on a number line, including dot plots, histograms, and box plots.	6.SP.5 Summarize quantitative measures of center and variability, as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered.
--	--	---	---	--

Unit 5 Essential Questions:

- *What are the benefits of each type of data plot when analyzing the distribution of a given data set?*
- *What do the measurements of variation: range, interquartile range (IQR) and mean absolute deviation (MAD); represent with respect to a numerical data set and how do they help us understand it better?*

Number Sense:

- *Odd one out*
- *Ways to make a number*
- *Always, Sometimes, Never*

Monday Engage NY Lesson 6-12

Objective: Given a data set, students calculate the median of the data. Students estimate the percent of values above and below the median value.

1. Warm up: Ways to Make a Number AND Video:
2. Classwork: Engage NY Lesson 6-12 Examples 1-4
3. Homework: Engage NY Lesson 6-12 Problem Set/Homework

Tuesday Engage NY Lesson 6-13

Objective: Given a set of data, students describe how the data might have been collected. Students describe the unit of measurement for observations in a data set. Students calculate the median of the data. Students describe the variability in the data by calculating the interquartile range.

4. Warm up: Ways to Make a Number AND Video:
5. Classwork: Engage NY Lesson 6-13 Example 1 and Exercises 1-6
6. Homework: Engage NY Lesson 6-13 Problem Set/Homework

Wednesday Engage NY Lesson 6-14

Objective: Students construct a box plot from a given set of data

7. Warm up: Ways to Make a Number AND Video:
8. Classwork: Engage NY Lesson 6-14 Examples 1-2 and Exercises 1-11
9. Homework: Engage NY Lesson 6-14 Problem Set/Homework

Thursday Engage NY Lesson 6-15

Objective: Given a box plot, students summarize the stat by the 5-number summary (Min, Q1, Median, Q3, and Max). Students describe a set of stat using the 5-number summary and the interquartile range. Students construct a box plot from a 5-number summary.

10. Warm up: Ways to Make a Number AND Video:
11. Classwork: Engage NY Lesson 6-15 Examples 1-2 and Exercises 1-15
12. Homework: Engage NY Lesson 6-15 Problem Set/Homework

Friday Unit 5 Vocabulary

Objective: Become familiar with the Unit 5 Vocabulary prior to beginning the unit

Agenda:

1. Warm up: Ways to Make a Number AND Video:
2. Classwork: Vocabulary Assignment
3. Homework: Finish any definitions that were not completed in class.

Assessing Knowledge - How will you help students to exhibit and self-evaluate their growing skills, knowledge, and understanding throughout the unit?	Exit Tickets and Teacher Observations	Exit Tickets and Teacher Observations	Exit Tickets and Teacher Observations	Exit Tickets and Teacher Observations	Exit Tickets and Teacher Observations
Differentiation/Accommodation - How will you tailor and otherwise personalize the learning plan to optimize the engagement and effectiveness of ALL students, without compromising the goals of the unit?	Pre written vocabulary & notes, extended time, preferential seating, reduced assignments	Pre written vocabulary & notes, extended time, preferential seating, reduced assignments	Pre written vocabulary & notes, extended time, preferential seating, reduced assignments	Pre written vocabulary & notes, extended time, preferential seating, reduced assignments	Pre written vocabulary & notes, extended time, preferential seating, reduced assignments
Learner Outcome - How will students demonstrate , as a result of lesson, their level of mastery? <ul style="list-style-type: none"> • Understand • Know • Do 	Given a data set, students calculate the median of the data. Students estimate the percent of values above and below the median value.	Given a set of data, students describe how the data might have been collected. Students describe the unit of measurement for observations in a data set. Students calculate the median of the data. Students describe the variability in the data by calculating the interquartile range.	Students construct a box plot from a given set of data	Given a box plot, students summarize the stat by the 5-number summary (Min, Q1, Median, Q3, and Max). Students describe a set of stat using the 5-number summary and the interquartile range. Students construct a box plot from a 5-number summary.	Students use the constant of proportionality to represent proportional relationships by equations in real- world contexts as they relate the equations to a corresponding ratio table or graphical representation.

Grade 7 Unit 1 Common Core State Standards (ALL)

<p>7.RP.1 Compute unit rates associated with ratios of fractions, including ratios of lengths, areas, and other quantities measured in like or different units.</p>	<p>7.RP.2a Decide whether two quantities are in a proportional relationship, e.g. by testing for equivalent ratios in a table or graphing on a coordinate plane and observing whether the graph is a straight line through the origin.</p>	<p>7.RP.2b Identify the constant of proportionality (unit rate) in tables, graphs, equations, diagrams, and verbal descriptions of proportional relationships.</p>	<p>7.RP.2c Represent proportional relationships by equations. For example, if total cost t is proportional to the number n of items purchased at a constant price p, the relationship between the total cost and the number of items can be expressed as $t=pm$</p>	<p>7.RP.2d Explain what a point (x,y) on a graph of a proportional relationship means in terms of the situation, with special attention to the points $(0,0)$ and $(1, r)$ where r is the unit rate.</p>	<p>7.G.1 Solve problems involving scale drawings of geometric figures, including computing actual lengths and areas from a scale drawing and reproducing a scale drawing at a different scale.</p>
--	---	---	--	---	---

Grade 7 Unit 1 Essential Questions:

- *How can you determine if a relationship is proportional or non-proportional from a table, graph, equation, and verbal description?*
- *How are scale drawings useful in the real world?*

Number Sense:

- *Number Talk*
 - *Ways to make a function from a given solution (only make proportional)*
 - *Always, Sometimes, Never*
 - *Odd One Out*
 - *What's my rule?*
 - *Visual Patterns*
-

Monday Engage NY Unit 1 Grade 7 Review for Test

Agenda:

1. Warm up: Rate of the Day AND Video:
2. Classwork/Homework: Review Packet for Unit 1 Test

Tuesday MSTEP TESTING

Wednesday Grade 7 Unit 1 FINAL TEST

Thursday Engage NY Lesson 7.2.1

Objective: Students add positive integers by counting up and negative integers by counting down (using curved arrows on the number line). Students play the Integer Game to combine integers, justifying that an integer plus its opposite add to zero. Students know the opposite of a number is called the additive inverse because the sum of the two numbers is zero.

Agenda:

3. Warm up: Rate of the Day AND Video:
4. Classwork: Engage NY Lesson 7.2.1
5. Homework: Engage NY Lesson 7.2.1 Problem Set/Homework

Friday Engage NY Lesson 7.2.2

Objective: Students model integer addition on the number line by using horizontal arrows; for example, an arrow for -2 is a horizontal arrow of length 2 pointing in the negative direction. Students recognize that the length of an arrow on the number line is the absolute value of the integer. Students add arrows (realizing that adding arrows is the same as combining numbers in the Integer Game). Given several arrows, students indicate the number that the arrows represent (the sum).

Agenda:

6. Warm up: Rate of the Day AND Video:
7. Classwork: Engage NY Lesson 7.2.2
8. Homework: Engage NY Lesson 7.2.2 Problem Set/Homework
