

Common Core State Standards

6.RP.1 Understand the concept of a ratio and use ratio language to describe a ratio relationship between two quantities.

6.RP.3 Use ratio and rate reasoning to solve real-world and mathematical problems, e.g. by reasoning about tables of equivalent ratios, tape diagrams, double number line diagrams, or equations.

6.RP.3a Make tables of equivalent ratios relating quantities with whole-number measurements, find missing values in the tables, and plot the pairs of values on the coordinate plane. Use tables to compare ratios.

Essential Question: *How do you use ratio concepts and ratio reasoning to solve problems?*

Monday: Engage NY Lesson 1.6

Objective: Students will use tape diagrams to solve problems when given a ratio between two quantities and a change to those quantities that changes the ratio.

Agenda:

1. Warm up: Ratio of the Day AND "Writing equivalent ratios"
2. Classwork: Engage NY Lesson 1.6 Exercises 2-7
3. Exit Ticket: "Solving problems using equivalent ratios"
4. Homework: Equivalent Ratios Worksheet

Tuesday: Engage NY Lesson 1.7

Objective: Students will understand the relationship between ratios and fractions. Students describe the fraction $\frac{3}{5}$ associated with the ratio as the value of the ratio 3 to 5. Students will understand that when given a ratio, different ratios can be formed from the numbers and the ratios are associated with the same ratio relationship.

Agenda:

1. Warm up: Ratio of the Day (go over procedures for solving *Ratio of the Day* Warm Up)
2. Classwork: Engage NY Lesson 1.7 Exercises 1-2
3. Exit Ticket: Use Equivalent Ratios to find unknown values
4. Homework: Engage NY Lesson 7: Associated Ratios and the Value of a Ratio

Wednesday: Engage NY Lesson 1.8

Objective: Students will understand that the value of A:B is the quotient A/B (as long as B is not equal to zero) and that if two ratios are equivalent, then their values are the same. Students will use the value of a ratio to solve ratio problems in a real-world context.

Agenda:

1. Warm up: Ratio of the Day AND "Simplifying Ratios" Video: <https://www.youtube.com/watch?v=XD1NnVH-BCI> OR <https://www.youtube.com/watch?v=8lyHglPxHYw>
2. Classwork: Engage NY Lesson 8 Exercises 1-3
3. Exit Ticket: *You created a playlist, and 100 of your friends listened to it and shared if they liked the new playlist or not. Drew said the ratio of the number of people who liked the playlist to the number who did not like the playlist is 75:25. Emma said that for every three people who liked the playlist, one person did not. Do Drew and Emma agree? Prove your answer using the values of the ratios.*
4. Homework: Engage NY Lesson 8 Problem Set/Homework

Thursday: Engage NY Lesson 1.9

Objective: Students will understand that a ratio is often used to describe the relationship between the amount of one quantity and the amount of another quantity as in the cases of mixtures or constant rates. Students will understand that a ratio table is a table of equivalent ratios and that they can be used to solve problems.

Agenda

1. Warm up: Ratio of the Day AND "Ratio Tables" Video: <https://www.youtube.com/watch?v=mQYv06QEotw>
2. Classwork: Engage NY Lesson 9 Exercises 1-2
3. Exit Ticket: "Ratio Tables" Exit Slip: *A father and young toddler are walking along the sidewalk. For every 3 steps the father takes, the son takes 5 steps just to keep up. What is the ratio of the number of steps the father takes to the number of steps a son takes? Be sure to add labels and columns to your table, and place the ratio into the first row of data. Add equivalent ratios to build a ratio table.*
4. Homework: Engage NY Lesson 9 Problem Set/Homework

Friday: Engage NY Lesson 1.10

Objective: Students will identify both the additive and multiplicative structure of a ratio table and use the structure to make additional entries in the table. Students will use ratio tables to solve problems.

Agenda:

1. Warm up: Ratio of the Day AND "Additive and Multiplicative Ratio Tables" Video: <https://www.youtube.com/watch?v=HYcMAFFTSdE>
2. Classwork: Engage NY Lesson 10 Exploratory Challenge and Exercise 1
3. Exit Ticket:
4. Homework: Lesson 10 Problem Set/Homework

Mrs. Rayman's Daily Instructional Plan- Grade 6 Math

	Monday	Tuesday	Wednesday	Thursday	Friday
Accessing Prior Knowledge - Where are your students headed? Where have they been? How will you make sure the students know where they are going?
